

! Be Aware of Legionella Bacteria in Household Water Tanks and Pipework !

Call now for a free inspection and assessment **+971 4 454 2986**

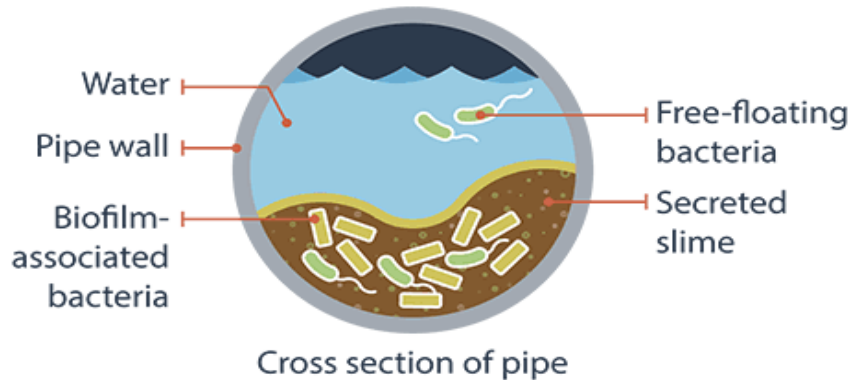

Water storage tanks and pipework in your home can be the perfect breeding ground for fungus and bacteria (especially Legionella Bacteria) if you don't maintain a certain level of water hygiene.

If Legionella Bacteria has formed in your water system it can be inhaled, as aerosols (droplets), when you turn on your shower or taps.

Legionella is harmful to humans and animals and can cause severe respiratory illnesses and can lead to pneumonia.

Legionella can live and grow in biofilm

VITEC ASPIDA ... a one stop solution to clean and disinfect your water system and protect your family
